Anna Montero

Frontend Developer · Product Engineering

Dubai, UAE | montero.katreena@gmail.com | annamontero.dev | LinkedIn | GitHub

SUMMARY

Product-minded frontend developer with 5 years building web UIs, 4 of them in production React/Next.js/TypeScript. I own features from design handoff to release, including proof-of-concepts I'm trusted to explore, build, and hand off cleanly. Seeking Product Engineer roles, remote or on-site in Dubai, that value good UX and real ownership.

EXPERIENCE

Frontend Developer, Splash Software — Nov 2022 to Present · 4 years

- Shipped production React/Next.js/TypeScript UIs across 4-5 products in a team of 5-6: carousels, content and product grids, search, auth entry points, and multi-language responsive layouts, including many server-rendered (SSR) pages.
- Regularly trusted with early proof-of-concept work: explored the idea, built it end to end, then handed it off cleanly for the team to build on.
- Built real-time interfaces on WebSockets (live sections and data grids updating without a page reload) and interactive card systems.
- Built CMS-driven pages with Strapi, a public developer docs portal (sidebar navigation, API tables), 3 back-office dashboards with Chart.js, and an API-backed internal testing panel for engineering and QA. Delivered 1 project focused on improving SEO.
- Turned Figma designs into MUI component systems, working across design, QA, backend, and DevOps under the CTO to deliver MVPs on deadline. Deployed on Azure, Vercel, Cloudflare, and Netlify.
- Built a Telegram mini-app with Howler.js audio playback and responsive controls, deployed on Cloudflare Pages.

Web Developer, White Pearl Fashion LLC — Dec 2021 to Oct 2022 · 11 months

- Delivered e-commerce features that improved storefront usability and shopping flows.
- Fixed UI defects and mobile responsiveness issues across the storefront.
- Supported SEO and social campaigns to grow online presence.

Web Development Intern, HashGate Technology — Sep 2021 to Dec 2021 · 3 months

- Implemented Shopify storefront features and improved wishlist UX, including custom interaction details.

EDUCATION

BSc Creative Computing, Bath Spa University
Oct 2021 · Experience Design, Web Development, Responsive Web

Diploma in International Foundation, Future Education World
Jun 2019

HOW I WORK

- Raise trade-offs and edge cases early
- Own features end to end
- Figma to production, with design and backend teammates
- Remote, or on-site in Dubai

SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, HTML, CSS/SCSS, Tailwind, MUI
Data & APIs	Redux, React Context, REST APIs, WebSockets, Headless CMS (Strapi or similar)
Delivery	Figma to production, Responsive UI, Performance, Cross-functional delivery
Tooling	Git, GitHub, Azure, Vercel, Cloudflare Pages, Netlify
